

SHUBHAJIT MANDAL

Software Development Engineer

Phone:+91-8486702021 | Email: shubhajit.mandal2025@gmail.com | GitHub: github.com/Mshubhajit

Location:Bengaluru,Karnataka, India | LinkedIn: [linkedin.com/in/shubhajit-mandal-202101f](https://www.linkedin.com/in/shubhajit-mandal-202101f)

SUMMARY

Results-driven Full Stack Developer with 5+ years of experience building scalable backend systems, cloud-native applications, and high-performance web solutions. Experienced in developing robust APIs and distributed systems using Java, GoLang, AWS, gRPC and microservices architecture. Skilled in optimizing application performance, improving system reliability, and delivering clean, maintainable engineering solutions in collaborative environments. Strong problem-solving abilities with a passion for innovation, continuous learning, and building impactful products.

EXPERIENCE

- Software Engineer (Full Stack)**
Volkswagen Group Digital Solutions, Bengaluru, India **Dec/2023-present**
Project: WeAnalyze – Failure Analysis Platform
 - Developed and maintained scalable enterprise applications for engineering and R&D investigation workflows, reporting systems and real-time collaboration.
 - Designed backend services and distributed APIs using Go, GraphQL, gRPC, REST APIs, Redis and SQL/NoSQL databases.
 - Reduced external service latency by ~60% through concurrent processing implementation using Go routines for distributed data retrieval workflows.
 - Architected automated report generation systems for Word and PowerPoint, improving operational efficiency and reducing manual effort.
 - Maintained automated testing coverage (~95%) and contributed to scalable system design and modern software development practices.
 - Contributed to Agile development, technical demos and AI/ML integration initiatives including RAG and OpenAI API workflows.
 - Utilised GitHub Copilot for Vibe Coding and AI-assisted development tools to improve productivity and code quality.
 - Implemented CI/CD pipelines, Docker-based deployments and cloud infrastructure using AWS and GitHub Actions.

- Software Engineer**
Happiest Mind Technologies, Bengaluru, India. **July/2021-Dec/2023**
Project: SaleSphere – Internal E-Commerce Platform
 - Developed scalable enterprise-grade microservices for product catalog, ordering and review management within e-commerce platform.
 - Built backend systems using Java, Spring Boot, Hibernate and REST APIs with focus on scalability, reliability, low-latency processing and maintainability.
 - Implemented unit and integration testing using JUnit and Mockito while participating in code reviews and maintaining high engineering standards.
 - Collaborated with cross-functional teams, project stakeholders, and QA teams to deliver new features, enhancements and production bug fixes in Agile environments.

EDUCATION

B.E in Computer Science and Engineering
Assam EngineeringCollege-Guwahati, Assam

SKILLS & TOOLS

- PROGRAMMING LANGUAGES**
Java (Core Java, Java 8), Go (Golang)
JavaScript, TypeScript, Python
- BACKEND AND FRAMEWORKS**
Spring Boot, Spring MVC, Hibernate Microservices,
REST APIs, GraphQL gRPC, WebSocket, SOAP, JSON
- FRONTEND**
React JS, HTML, CSS, TailwindCSS, Apollo Client
- DATABASE & CACHING**
MySQL, MongoDB, DynamoDB, Redis, SQL Server
- CLOUD & DEVOPS**
AWS (Lambda, S3, SQS, SNS, Secrets Manager,
CloudFormation, SAM, CloudWatch) Docker, GitHub
Actions, CI/CD, Kubernetes, Linux
- TESTING AND OBSERVABILITY**
JUnit, Mockito, Vitest, Gradle, Zipkin, Log4j,
OpenTelemetry
- AI & MODERN DEVELOPMENT**
GitHub Copilot, RAG Applications, LLM Integration,
Vector Databases AWS SageMaker, OpenAI APIs
- TOOLS & METHODOLOGIES**
Git, Postman, Jira, Agile Scrum SDLC, Code Review,
System Design, VS Code, IntelliJ

CERTIFICATIONS

AWS Certified Cloud Practitioner
AWS Certified Machine Learning Engineer - Associate

KEY ACHIEVEMENTS

- ~60% Latency Reduction
Concurrent Go routines eliminated bottlenecks in WeAnalyze distributed data retrieval workflows.
- ~95% Test Coverage
Maintained high automated testing coverage across WeAnalyze platform for production reliability.
- InstaPat & Trendsetter Awards
Recognised for innovation and impactful contributions; participated in iMobilothon contributing pilot ideas.
